

Ankit Rai

Java developer with 3.10+ years of experience in application development. Proficient in Java, SQL, Spring Boot, MongoDB and testing tools like JUnit and Mockito. Seeking to contribute to a dynamic team focused on innovation and quality.

SKILLS

Language: Java, SQL, Xtend, Python, NoSQL

Framework: Eclipse RCP, Spring Boot, Spring MVC, Spring Data JPA, ORM, Junit, Mockito, Spring Cloud, Spring AI, Spring Cloud Function, Spring Security

Tools: Eclipse IDE, IntelliJ IDEA, Postman, VisualVM, JDCompiler, JACOCO, Azure Pipeline, Docker, Azure Cloud, MongoDB Atlas, Azure SQL, Azure DevOps, MongoDB Compass, Relational Database Migrator, Azure Function, JMeter, REST API, Swagger etc.

EXPERIENCE

[ZF Group, Hyderabad \(India\)](#) – Senior Software Engineer

Jan 2022 - PRESENT

- **Developed and maintained a new feature in the Eclipse Plugin for DSL**, improving user efficiency by 30% through seamless integration of features and demonstrating proficiency in plugin-based development.
- **Developed 10+ APIs**, with a strong understanding of MS-SQL and SharePoint API integration, enhancing data exchange functionality and reducing manual processes by 40%.
- **Integrated MSSQL and SharePoint API with an Eclipse plugin-based tool**, enabling seamless data exchange and reducing manual activities for tool users by 50%, improving overall productivity.
- **Designed and developed a telematics solution** for tracking real-time tool users, providing management with insights that reduced operational costs by 20% and increased user engagement by 25%.
- **Worked on a modern GUI using Electron and React.js**, integrating with Eclipse plugin tool, RESTful web services API, SharePoint list, and MSSQL database, which enhanced the user experience and increased tool adoption by 15%.
- **Led the migration of 2TB+ of data** from SharePoint to MongoDB Atlas, ensuring seamless data transfer, optimizing scalability and performance, and reducing query processing time by 35%.
- **Developed a CRUD application** to manage user data with a MongoDB backend, integrated with Microsoft Logic Apps, and created comprehensive API documentation using Swagger.

PROJECTS

ZF Group, Hyderabad (India)

Jan 2022 - PRESENT

Project Name: Webservices API for Eclipse Plugin based tool

Description: Developing modern GUI-based on Eclipse plugin tool with RESTful web services API, integrating with SharePoint list and MSSQL database to enhance user experience and data exchange. The API enables seamless data synchronization, providing a robust and scalable solution for plugin users.

Tools & Technologies: Java, Spring Boot, Spring MVC, Postman, MS-SQL, Azure Cloud

Project Name: Telematic Solution for Tool Usage Tracking and Management Insights

Description: Designed and Built a comprehensive telematic solution to track tool usage and provide valuable insights to management for informed decision-making. The solution consists of a user-friendly frontend built using React, a robust backend build with Java and Spring Boot, and leverages CORS and web services for seamless interaction.

Tools & Technologies: Java, Spring Boot, Spring MVC, Postman, MS-SQL, React.js

Project Name: Eclipse Plugin (DSL & RCP) Tool to validate ARXML

Description: Maintained an Eclipse plugin RCP and DSL tool to validate 1000+ ARXML and XSD files, ensuring model designing accuracy. The tool applied predefined rules to check parameter availability, generating reports in XML and XLSX formats. These reports enabled automation of ARXML file structure and validation checks.

Tools & Technologies: Java, MSSQL, SharePoint API, Xtext, Xtend, DSL, ARTOP, AUTOSAR Meta Models

EDUCATION

University of Mysore, India – Master in Computer Application

April 2021 - April 2023, Mysore

Graduated with a Master's in Computer Applications, covering Java, C, C++, Python, Data Structures, Database Management, and Software Engineering. Build a strong foundation in programming, algorithm design, and software development methodologies, preparing me for diverse roles in technology.

CERTIFICATIONS

- ISTQB Foundation Level
- Google Digital Fundamental
